Dear OSU student Bachelor’s degree student:

All incoming graduate students must present proof of a bachelor’s degree before registering in a graduate program. This includes students who are graduating from OSU. OSU students are at an advantage because we can use the MyDegrees audit to allow registration instead of waiting for your official transcript.

Please understand that your MyDegrees audit must show 100 percent completion before you can register for your graduate program. We will check the audit at your request, but we cannot accept anything less than 100 percent. We know that there is a very tight timeline for students who begin graduate studies immediately after finishing a bachelor’s degree.

Serious complications arise if a student registers for graduate classes and is later found not to have earned a bachelor’s prior to the term in which graduate degree study begins. This policy is in place to avoid legal, financial and other complications that cause hardships to students.

Sincerely,
